EXPERIENCE

Frontend Developer Jr
Goblin
Dec 2023 - Mar 2024

Development of landing pages and user interfaces using React and Next.js, integrating the Mercado Pago API to process card payments. In addition, a blog was created with WordPress, standing out in the implementation of functional and attractive solutions for web projects.

Agroindustrial engineering
Alma de Huila
Apr 2023- Apr 2024

Responsible for coordinating logistics, administering payrolls, managing work teams and performing quality analysis of the product, both physical and sensorial. The focus was on specialty coffees, highlighting process improvement, project management and efficient production organization.

PROJECTS

Huila Travel
Nov 2024

Backend and part of the frontend development of a web application designed to facilitate the booking of tourist sites in the department of Huila, Colombia. The platform allows users to explore and book tourist plans, manage their profiles and access a personalized reservation system.
- Technologies and tools: Node.js, MongoDB, Mongoose, Express and React.

Social Net
Oct 2024

Development of the backend and frontend of a web application designed to foster interaction between users. The platform includes key functionalities such as registration, login, profile creation and management, and content publishing.
- Technologies and tools: Node.js, TypeScript, Express, MongoDB, and React.
